

Besides the standard series of seals and wear rings WE ALSO DELIVER SPECIAL SEALS and CUSTOM DESIGNED ITEMS. The advanced manufacturing technique on CNC machinery makes it possible to produce special seals in a rational manner.

In the great range of Kefloy® and Ultralen® compounds with their variety of remarkable properties it is always possible to find a material which suits the application.

Our technical experts, with many years of experience in solving sealing problems, offer their assistance in designing of seals and in selection of the right Kefloy or Ultralen compound.
